

Bespoke tablet security devices

Welcome to our latest in-store security devices for tablet and smartphone security.

Tablet and Smartphone security is an extension to Whiteghyll's portfolio of retail display solutions.

We have been working with Apple, Samsung, Sony, Commtiva, HTC, Kindle and BlackBerry to provide attractive and superior retail display solutions that enable secure customer interaction with their displayed merchandise.

Our metal product security displays have been tested and offer:-

- Superior security against theft.
- Product rotation to allow the customer to test in-store and improve their shopping experience.
- Bespoke security units manufactured to your specific requirements.

Our experienced CSCS certified installation teams are available to install promotional, semi permanent, permanent, or bespoke security devices.

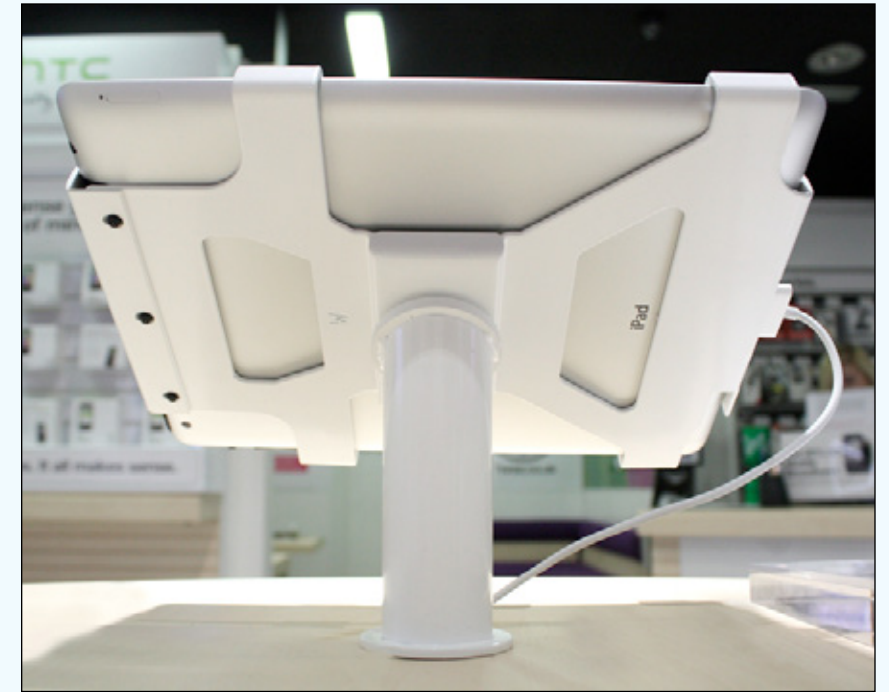

Laser cut to shape, providing consistent results on individual or large volume orders.

All security units are fabricated from stainless steel.

Security points can be altered to cover on/off switches etc.

Bespoke security screw fixings and release tools are tailored to meet individual requirements.

We carry out all installations or provide instruction sheets for you to self assemble.

We would be delighted to discuss your individual requirements.
